National Voters' Day is celebrated annually in India on 25 January to mark the foundation day of Election Commission of India. It established by the Government of India in order to encourage more young voters to take part in the political process, and first celebrated 25 January 2011. The new voters would be provided with a badge with its logo "Proud to be a voter - Ready to vote", This activity was conducted under the supervision of Prof. G.K.Bide, NSS program Officer, and Prof. R.M.Suryawanshi under the guidance of Dr. D. R. Patil Principal R.C.Patel Arts, Commerce and Science College, Shirpur.

Outcome of Program:-

In any election, the outcome can be determined by just a few votes. That's why your vote is so important! When you don't vote, you are essentially giving up your say in how your community, state, and country are run. Furthermore, by not voting you are also missing out on an opportunity to have a voice on critical issues that affect your life.

There is also a larger impact of voting beyond just the individual race or ballot initiative. Voting is an important way to exercise your civic duty and be an active member of society. When turnout is low, it can send a message that people are disengaged and uninterested in the political process. This can lead to even lower turnouts in future elections as well as a general feeling of dissatisfaction with government among citizens. So next time there's an election, make sure you get out and vote! It's one of the most important things you can do to have a say in the direction of your community, state, and country.

Outcome of Program

Planting trees is the ideal approach to support nature. It additionally helps other living species, including people, in many ways. Trees give us oxygen, food, shelter, and many more. They are natural air filters and noise safeguards. Trees are the earth's life supportive network. They support and are essential for life on earth. Aside from giving oxygen, trees additionally work as common safeguards of noise pollution. The forests do develop naturally. Be that as it may, today, forests are chopped down at a rate more noteworthy than they could develop. This causes a sort of irregularity, wherein relatively few trees are left to meet our oxygen supply and different requirements.

History of Unnat Bharat Abhiyan

The conceptualization of Unnat Bharat Abhiyan originated from the endeavors of a dedicated group of faculty members at the Indian Institute of Technology (IIT) Delhi, possessing expertise in rural development and appropriate technology. The concept evolved through extensive consultations with representatives from various technical institutions, Rural Technology Action Group (RuTAG) coordinators, voluntary organizations, and government agencies actively engaged in rural development. These deliberations took place during a national workshop hosted at IIT Delhi in September 2014, sponsored by the Council for Advancement of People's Action and Rural Technology (CAPART), Ministry of Rural Development, Government of India. The program received formal inauguration by the Ministry of Education (MoE) (formerly Ministry of Human Resource Development (MHRD)), with the President of India presiding, on November 11, 2014.

As per schedule provided by **Maharashtra. In this regard on 08 August 2022 (Monday), at 9:00 AM, an **Election Awareness Rally** has been organized to educate the students regarding the importance of voting through the means of slogans. The Rally was inaugurated by **Prof. R. M. Surwyawanshi**, through his motivational speech. Rally was successfully marched by the students, faculty members and other staff with great enthusiasm. Total 150 participants have been registered who participated in the E-voters pledge. The event was successfully coordinated by **Mr.G.K.Bide**, and team.

Importance of Voting

Voting is important because it is a way for people to have a say in their government and to elect officials who represent their interests. It is also a way for people to hold their government accountable. Voting allows people to have a voice in the decisions that affect their lives.

In addition to being a fundamental right, voting is also important for the health of our democracy. When people do not vote, they are effectively silencing themselves and ceding power to those who do vote. This can lead to bad decisions being made that impact everyone, even those who did not bother to vote.

Finally, voting is important because it sends a message to our elected officials that we care about what happens in our country and that we are paying attention to the issues that matter to us. When large numbers of people don't vote, it sends the message that we are complacent and that they can get away with anything.

The Election Awareness Rally held on August 8, 2022, at 9:00 AM, was a great initiative to educate students about the importance of voting. Using slogans to convey this message is an effective way to engage and inspire young voters to participate in the democratic process.

शिरपूर : आर. सी. पटेल कला, वाणिज्य व विज्ञान महाविद्यालयाच्या रासेयो स्वयंसेवकांनी कोरोना प्रतिबंध लस आणि रक्तदान करण्याविषयी ग्रामीण भागातील ग्रामस्थांचे प्रबोधन केले.

महाविद्यालयाच्या रासेयो विभागामार्फत कोविड विषाणूच्या प्रतिबंधात्मक लसिकरणाविषयी व रक्तदानाबद्दल घरोघरी जाऊन जनजागृती करण्यात येत आहे. मागील काही दिवसांपासून देशात कोरोना रुग्णांची संख्या झपाट्याने वाढत आहे. इतर राज्यांच्या तुलनेत महाराष्ट्राची स्थिती आणखीच बिकट आहे. यामुळे

कोरोना विषाणूला हरवण्यासाठी व्यापक प्रमाणात लसिकरण होणे आवश्यक आहे. मात्र अजूनही लसिकरणाला हवा तसा प्रतिसाद

मिळत नाही. तसेच राज्यातील रक्तटंचाई निर्माण झाली आहे. यामुळे प्राचार्य डॉ. डी. आर. पाटील यांच्यामार्गदर्शनाखाली जनजागृती

कार्यक्रम राबविण्यात आला. रासेयो कार्यक्रम अधिकारी प्रा.गोपाल बिडे यांनी हा उपक्रम सुरू केला आहे. सर्वसामान्य जनतेत लसिकरणविषयी

जनजागृती रासेयो स्वयंसेवक हे घरोघरी जाऊन करीत आहेत. यात अनिता धनगर, सत्यजित महाजन, गौतम पवार, शुभांगी पाटील, विशाखा राजपूत, हर्षल भोई, रोशन पवार, प्रीतम माळी, श्रीधर पाटील, आकाश भोई, राजेश राठोड, राहूल हजारे, वर्षा पाटील यांनी सहभाग नोंदविला. प्राचार्य डॉ. डी. आर. पाटील, उपप्राचार्य डॉ. ए.एम.पाटील व उपप्राचार्य डॉ. आर.डी.जाधव यांनी कौतुक केले. कार्यक्रम अधिकारी गोपाल बिडे, सहाय्यक कार्यक्रम अधिकारी प्रा. आर.पी.महाजन, महिला कार्यक्रम अधिकारी डॉ.अनिता जाधव यांनी परिश्रम घेतले.

Tree Plantation programmed was organized at R.C.Patel Arts,Commerce and Science College Shirpur through National Service Scheme Unit on 9th August, 2021.

Tree Plantation programmed was held in our Bijasani Mata Temple Area on 9th August, 2021 at 09.00 am. The students of 1st year actively participated in the programmed. Principal, Dept HOD's, faculty, NSS Volunteers, students are plant saplings in Bijasani Mata Temple Area. Our faculty had also explained about the trees and the importance of tree plantation. Every man needs the oxygen for their life and Trees are the foremost source of oxygen as well trees help to reduce the level of co2. As we all know that the whole world is facing the problem of global warming and to recover from such problem planting the trees has become one of the most important today's aspects. The NSS Unit of our College organized "Tree Plantation" programmed "MY EARTH – MY DUTY" under the National Service Scheme (NSS) on Wednesday, 9th August, 2021. At the end of programmed there was a photo session with Principal, faculty and students. Planting trees is the ideal approach to support nature. It additionally helps other living species, including people, in many ways. Trees give us oxygen, food, shelter, and many more. They are natural air filters and noise safeguards. Trees are the earth's life supportive network. They support and are essential for life on earth. Aside from giving oxygen, trees additionally work as common safeguards of noise pollution. The forests do develop naturally. Be that as it may, today, forests are chopped down at a rate more noteworthy than they could develop. This causes a sort of irregularity, wherein relatively few trees are left to meet our oxygen supply and different requirements.

Benefits of Tree plantation in Social Terms

- Trees make life nicer. It has been shown that spending time among trees and green spaces reduces the amount of stress that we carry around with us in our daily lives.
- Hospital patients have been shown to recover from surgery more quickly when their hospital room offered a view of trees.
- Children have been shown to retain more of the information taught in schools if they spend some of their time outdoors in green spaces.
- Trees are often planted as living memorials or reminders of loved ones or to commemorate significant events in our lives.

Plastic pollution is a huge environment and health issues as it harms us in more than one way such as it clogs drains, causes visual pollution and proves fatal for stray animals. So with “Beat Plastic Pollution”, the theme for World Environment Day 2022, United Nation (UN) is encouraging worldwide awareness and action for the protection of our environment from plastic pollution. So 11th March, 2022 The Day will raise awareness and urge governments, industry, communities, and individuals to come together and explore sustainable alternatives and urgently reduce the production and use of single-use plastic that pollutes oceans, damages marine life and threatens human health. Our college has taken an initiative of “Plastic Free Cleanliness Drive” in collaboration with Shirpur Warwade Nagar Palica which will conclude on 11th March, 2022. Going by ‘Beat Plastic Pollution’ theme of World Environment Day, the focus will be to get rid of plastic waste from the city.

Introduction

Sickle cell disease is an inherited blood condition which is most common among people of African, Arabian and Indian origin. In disease of African origin, research has led to models of care which prevent serious complications, improve the quality of life, and increase survival. In India, the disease is largely undocumented. Thus, there is an urgent need to document the features of Indian disease so that locally appropriate models of care may be evolved.

The sickle cell mutation affects the beta chain of adult haemoglobin which changes the behaviour of sickle cell haemoglobin. Possession of a single *HbS* gene results in the generally harmless sickle cell trait (AS genotype) but inheritance of the *HbS* gene from both parents results in homozygous sickle cell (SS) disease which is often a severe condition destroying red blood cells rapidly and blocking flow in blood vessels with painful and often serious complications. Arabian Gulf and India and designated the Arab-Indian or Asian haplotype. First described in the Nilgiri Hills of northern Tamil Nadu in 1952 the sickle cell gene is now known to be widespread among people of the Deccan plateau of central India with a smaller focus in the north of Kerala and Tamil Nadu. Extensive studies performed by the Anthropological Survey of India have documented the distribution and frequency of the sickle cell trait which reaches levels as high as 35 per cent in some communities.

People with sickle cell anemia inherit the disease from their biological parents. In sickle cell anemia, the gene that helps make normal red blood cells mutates, or changes. People who inherit the mutated hemoglobin protein gene from both biological parents have sickle cell anemia. People who inherit the mutated gene from one biological parent have the sickle cell trait.

Outcomes of Program

Villagers were made aware about sickle cell diseases

Transfer of sickle cell diseases from parents to offspring was explained to villagers.

Counseling of sickle cell positive villagers was done.

On 3rd March, 2022 NSS unit of RCPACS organized a Sickle Cell disease detection and awareness camp for the residents of Balade village.

Name of Event: - AIDS Awareness Rally

Date: - 01/12/2021

Time: - 09:00am to 12.00 Pm

Venue: - At Shirpur

Participants: -65 + NSS student's volunteer And Teacher.

This is an annual event that serves as a reminder of the global struggle to end HIV-related stigma, an opportunity to honor those we have lost, and a rallying cry to commit to working toward a day when HIV is no longer a public health threat.

The first World AIDS Day took place in 1988, providing a platform to raise awareness about HIV and AIDS and honor the lives affected by the epidemic. There has been significant progress in addressing HIV and AIDS thanks to advancements in medical research, increased access to treatment and prevention, and a broader understanding of the virus.

The White House Recognizes World AIDS Day

Each year, the White House releases a proclamation in honor of World AIDS Day. On December 1, 2019, the White House released the National HIV/AIDS Strategy Interim Action Report, which highlights that thanks to the efforts of the community, state, and federal partners, our nation is making important progress toward the goals outlined in the Strategy.

Outcome

- **Protect yourself during sex:** To reduce your risk of getting HIV, use condoms correctly every time you have sex.

- **Protect yourself if you inject drugs:** Do not inject drugs. If you do, use only sterile injection equipment and water, and never share your equipment with others.
- **Protect yourself by taking PrEP:** If you do not have HIV but are at risk of getting HIV, talk to your health care provider about pre-exposure prophylaxis (PrEP). PrEP involves taking a specific HIV medicine every day or an injectable HIV medicine every two months to reduce the risk of getting HIV through sex or injection drug use.
- **Protect others if you have HIV:** Take HIV medicine (called antiretroviral therapy or ART) as prescribed by your doctor. ART can reduce the amount of HIV in the blood (called viral load) to the point where a test cannot detect it (called an undetectable viral load). If you have an undetectable viral load, you will not transmit HIV to your partner through sex.
- **Prevent perinatal transmission:** If you have HIV and take HIV medicine as prescribed by your doctor throughout pregnancy and childbirth, the chances of transmitting HIV to your baby are less than 1%. If you have a partner with HIV and are considering getting pregnant, talk to your doctor about PrEP to help protect you and your baby from getting HIV while you try to get pregnant, during pregnancy, or while breastfeeding.

भारत को विश्व का सिरमौर बनाना है,
"कोरोना महामारी" से सतर्कता, हमें अपनाना है।
मास्क पहनना, हाथों को सैनिटाइज करना,
ये सब ना करने का, चलेगा अब न कोई और बहाना है।

देश को जो समृद्ध, हमें बनाना है,
साफ-सफाई, मास्क, सैनिटाइजर को अपना हथियार बनाना है।
दो गज की दूरी है आज सतर्कता की पहचान,
मात्र इतनी दूरी को, जीवन का हिस्सा बनाना है।

वैक्सीन का तो पता नहीं, सतर्कता को ही उपाय बनाना है।

अपनों तथा देशवासियों की जान, हमें ही बचाना है।

देश को अगर समृद्ध हमें बनाना है,

निश्चित ही कोरोना महामारी से सतर्कता अपनाना है।

भ्रष्टाचारी, घूसखोरी, बलात्कारी हैवानों को भी,

खदेड़कर देश से भागना है।

देश को अगर समृद्ध बनाना है,

ईमानदारी, सतर्कता, हिम्मत और विश्वास को अपने अंदर बढ़ाना है।

एकता, अखंडता, संप्रभुता; जो हमारा आईना थे कभी,

इन्हें दोबारा भारत देश की पहचान बनाना है।

सतर्कता ही उपाय है, यह समझना होगा हमें,

लापरवाही को स्वयं से, कोसो दूर भगाना है।

जो हो नींव अगर मजबूत,

इमारतें आसानी से हिला नहीं करती।

इसलिए हमें "सतर्क भारत को ही,

समृद्ध भारत" का आधा र बनाना है।

On Saturday, January 18, 2021, at 10 a.m., R. C. Patel Arts, Commerce and Science College, Shirpur commemorated “Savitribai Phule's birth anniversary”. On the occasion of this day, college organized an online webinar on “Gender Equality”.

Outcome of the Program

Gender equality is not only a fundamental human right, but a necessary foundation for a peaceful, prosperous and sustainable world. There has been progress over the last decades, but the world is not on track to achieve gender equality by 2030.

Women and girls represent half of the world’s population and therefore also half of its potential. But gender inequality persists everywhere and stagnates social progress. On average, women in the labor market still earn 23 percent less than men globally and women spend about three times as many hours in unpaid domestic and care work as men.

Sexual violence and exploitation, the unequal division of unpaid care and domestic work, and discrimination in public office, all remain huge barriers. All these areas of inequality have been exacerbated by the COVID-19 pandemic: there has been a surge in reports of sexual violence,

On this occasion, to commemorate his work done and to take his inspiration from his ideals, RCPACS College organized an online Workshop on the theme “Youth Power towards nation-building and universal brotherhood” for all the students of College. Further, the ideas on the education of Swami Vivekananda were shared in institutional social media.

Swami Vivekananda, the great philosopher, thinker and the greatest patron of the youth in India, was born on January 12, 1863 on the Pausha Krishna Saptami Tithi in Kolkata (then Calcutta). Every year since 1985, the Government of India observes January 12, the birth anniversary of Swami Vivekananda, as the National Youth Day and the week commencing from that day, as the National Youth Week. To quote from a Government communication: “it was felt that the philosophy of Swamiji and the ideals for which he lived and worked could be a great source of inspiration for the Indian Youth.”

Under the component ‘Promotion of National Integration’ of National Programmed for Youth and Adolescent Development (NPYAD), a National Youth Festival is organized during the month of January every year to commemorate the birth anniversary of Swami Vivekananda (12 January), which is celebrated as National Youth Day. The Festival is organized in partnership with one of the States/UTs. The expenditure is shared between the Centre and the host State. The Programmed that

India is a vibrant and diverse nation with many people of different castes and religions, speaking different languages are living together in complete harmony. National unity is significant for construction of a complete nation with the aim of “One India, Excellent India” (Ek Bharat Shrestha Bharat). Good relationship among the people of the nation is a binding force that brings peace and development and also enables us to unify against various threats of enemies.

National Unity Day is an initiative celebrated every year to commemorate Sardar Vallabhbhai Patel’s birth anniversary.

What Is HIV?

HIV stands for Human Immunodeficiency Virus. HIV is the virus that causes AIDS.

Your immune system is your body's defense system. While the immune system can control many viruses, HIV targets and infects the same immune system cells that protect us from germs and illnesses. These cells are a type of white blood cell called CD4 cells (which are a type of T cells).

Without medication to control the virus, HIV usually takes over CD4 cells and turns them into factories that produce millions of copies of the virus. As the virus makes copies, it damages or kills the CD4 cells, weakening the immune system. This is how HIV causes AIDS.

There are many different strains of HIV that are grouped into two main types:

- HIV-1: most common type worldwide
- HIV-2: found mostly in West Africa, Asia, and Europe

This is an annual event that serves as a reminder of the global struggle to end HIV-related stigma, an opportunity to honor those we have lost, and a rallying cry to commit to working toward a day when HIV is no longer a public health threat.

The first World AIDS Day took place in 1988, providing a platform to raise awareness about HIV and AIDS and honor the lives affected by the epidemic. There has been significant progress in addressing HIV and AIDS thanks to advancements in medical research, increased access to treatment and prevention, and a broader understanding of the virus.

The White House Recognizes World AIDS Day

Each year, the White House releases a proclamation in honor of World AIDS Day. On December 1, 2019, the White House released the National HIV/AIDS Strategy Interim Action Report, which highlights that thanks to the efforts of the community, state, and federal partners, our nation is making important progress toward the goals outlined in the Strategy.

What Is the Difference Between HIV and AIDS?

You do not have AIDS as soon as you acquire HIV. You can live with HIV for many years with no signs of disease, or only mild-to-moderate symptoms. People living with HIV and taking HIV drugs as prescribed have a very low risk of progressing to AIDS. But without treatment, HIV will eventually wear down the immune system in most people to the point where they have few CD4 cells and develop opportunistic infections.

Outcome

- **Protect yourself during sex:** To reduce your risk of getting HIV, use condoms correctly every time you have sex.
- **Protect yourself if you inject drugs:** Do not inject drugs. If you do, use only sterile injection equipment and water, and never share your equipment with others.
- **Protect yourself by taking PrEP:** If you do not have HIV but are at risk of getting HIV, talk to your health care provider about pre-exposure prophylaxis (PrEP). PrEP involves taking a specific HIV medicine every day or an injectable HIV medicine every two months to reduce the risk of getting HIV through sex or injection drug use.

- **Protect others if you have HIV:** Take HIV medicine (called antiretroviral therapy or ART) as prescribed by your doctor. ART can reduce the amount of HIV in the blood (called viral load) to the point where a test cannot detect it (called an undetectable viral load). If you have an undetectable viral load, you will not transmit HIV to your partner through sex.

Prevent perinatal transmission: If you have HIV and take HIV medicine as prescribed by your doctor throughout pregnancy and childbirth, the chances of transmitting HIV to your baby are less than 1%. If you have a partner with HIV and are considering getting pregnant, talk to your doctor about PrEP to help protect you and your baby from getting HIV while you try to get pregnant, during pregnancy, or while breastfeeding.

Tree planting is the process of transplanting tree seedlings, generally for forestry, land reclamation, or landscaping purposes. It differs from the transplantation of larger trees in arboriculture and from the lower-cost but slower and less reliable distribution of tree seeds. Trees contribute to their environment over long periods of time by providing oxygen, improving air quality, climate amelioration, conserving water, preserving soil, and supporting wildlife. During the process of photosynthesis, trees take in carbon dioxide and produce the oxygen we breathe.

In silviculture, the activity is known as "reforestation", or "afforestation," depending on whether the area being planted has recently been forested or not. It involves planting seedlings over an area of land where the forest has been harvested or damaged by fire, disease, or human activity. Tree planting is carried out in many different parts of the world, and strategies may differ widely across nations and regions and among individual reforestation companies. Tree planting is grounded in forest science and, if performed properly, can result in the successful regeneration of a deforested area. Reforestation is the commercial logging industry's answer to the large-scale destruction of old-growth forests, but a planted forest rarely replicates the biodiversity and complexity of a natural forest

Because trees remove carbon dioxide from the air as they grow, tree planting can be used to help limit climate change. Desert greening projects are also motivated by improved biodiversity and reclamation of natural water systems, as well as improved economic and social welfare due to an increased number of jobs in farming and forestry.

We cannot live without online shopping, digital payments, messaging, and email. The internet revolution and developments in digitization have reached every part of the nation. While India claims to have one of the fastest-growing economies in the world, a recent study by the Digital Empowerment Foundation found that just 30% of our population is basic literate, and that number is double for digital literacy. To give every person access to the internet, the government introduced Digital India in 2015. Although there is no doubt about its potential advantages, there are still difficulties, such as slow infrastructure development, bandwidth availability, personal computer penetration, and scaling ability.

Villagers enjoyed the session and appreciated the effort of NSS volunteers and consented for digital transaction.

Outcome of Program

1. Support Educational Progress
2. Increase Online Safety
3. Understand Digital Responsibility
4. Improves Social Opportunities
5. Improve Digital Equity
6. Supports Lifelong Skills

A hemoglobin test is a blood test. It measures the amount of a protein in red blood cells called hemoglobin. Hemoglobin carries oxygen to the body's organs and tissues when you breathe in. Then it carries the waste gas carbon dioxide back to the lungs to be breathed out.

If a hemoglobin test shows that your hemoglobin level is lower than it should be, that's a sign of a condition called anemia. Causes of anemia include low levels of certain nutrients, blood loss and some long-term diseases.

What is a Hemoglobin Test?

A hemoglobin test measures the levels of hemoglobin in your blood. Hemoglobin is a protein in your red blood cells that carries oxygen from your lungs to the rest of your body. If your hemoglobin levels are abnormal, it may be a sign that you have a blood disorder.

What is it used for?

A hemoglobin test is often used to check for anemia, a condition in which your body has fewer red blood cells than normal. If you have anemia, the cells in your body don't get all the oxygen they need. Hemoglobin tests are measured as part of a complete blood count (CBC).

Why do I need a hemoglobin test?

Your health care provider may order the test as part of a routine exam, or if you have:

- Symptoms of anemia, which include weakness, dizziness, and cold hands and feet
- A family history of thalassemia, sickle cell anemia, or other inherited blood disorder
- A diet low in iron and other minerals
- A long-term infection
- Excessive blood loss from an injury or surgical procedure

What happens during a hemoglobin test?

A health care professional will take a blood sample from a vein in your arm, using a small needle. After the needle is inserted, a small amount of blood will be collected into a test tube or vial. You may feel a little sting when the needle goes in or out. This usually takes less than five minutes.

Will I need to do anything to prepare for the test?

You don't need any special preparation for a hemoglobin test. If your health care provider has ordered other tests on your blood sample, you may need to fast (not eat or drink) for several hours before the test. Your health care provider will let you know if there are any special instructions to follow.

Are there any risks to the test?

There is very little risk to having a blood test. After the test, some people experience mild pain, dizziness, or bruising. These symptoms usually go away quickly.

What do the results mean?

There are many reasons your hemoglobin levels may not be in the normal range.

Low hemoglobin levels may be a sign of:

- Different types of anemia
- Thalassemia
- Iron deficiency

- Liver disease
- Cancer and other diseases

High hemoglobin levels may be a sign of:

- Lung disease
- Heart disease
- Polycythemia vera, a disorder in which your body makes too many red blood cells. It can cause headaches, fatigue, and shortness of breath.

If any of your levels are abnormal, it doesn't always mean you have a medical condition that needs treatment. Diet, activity level, medicines, a menstrual period, and other factors can affect the results. You may also have higher than normal hemoglobin levels if you live in a high altitude area. Talk with your provider to learn what your results mean.
