

About Training Courses

Training and Placement Cell to provide placement support for students. The cell is in constant contact with HR departments of prominent organizations to promote the institute and student's profile. Apart from campus recruitment, the cell also arranges off-campus recruitments and ensures that each student gets a fair chance to face the interviews. Aptitude tests, Group discussions and pre-campus mock interviews are conducted at regular intervals enabling students to get rid of the phobias and to prepare them for the major event. Some of the companies associated with us are Infosys, Hex aware, Tata Consultancy Services, Accenture, Overall, it's an unswerving aspiration of RCPACS to encourage our students. We not only prepare the generation-next for the challenges of the industry but also inspires them to explore and research for the creation of larger good for the society, by creating a stimulating, holistic and enriching learning experience.

Training focuses on immediate skills improvement for job tasks, while development prepares employees for future roles by enhancing personal skills. The training process involves analysing needs, setting objectives, designing and implementing training, then evaluating results.

About Company Details

In 2008, a Kentuckian named Nate Morris teamed up with an old high school friend named Marc Spiegel—whose family had been in the waste and recycling business for more than a century—to create a better, more sustainable way to deal with the problem of waste. And with that, Rubicon was born.

Today, Rubicon is a leading provider of software-based waste, recycling, and fleet operations products for businesses and governments worldwide. With more than 13 million service locations, Rubicon focuses on developing software solutions that bring new transparency to the waste and recycling industry—encouraging customers to make data-driven decisions that lead to more efficient and effective operations as well as more sustainable outcomes.

We manage all waste and recycling services through an extensive network of more than 8,000 vendor and hauler partners. Our programs span cardboard (OCC), plastic, paper, metal, glass, electronics recycling, construction and demolition (C&D), organics recycling (including food waste and composting services), and single-stream recycling (SSR). Our subject matter experts manage commodity markets, zero-waste programs, and other sustainability offerings across our portfolio. On top of all that, we offer an advanced smart city solution, RUBICONSmartCity™, that helps municipalities achieve and maintain more efficient, effective, and sustainable waste and recycling operations.
