Sexual Harassment Prevention Cell

Report of Lecture on Youth Development: Issues , challenges and Directions (2022-

**R. C. Patel Arts, Commerce and Science College Organized
Lecture on Youth Development : Issues , challenges and Directions**

Date -10/09/2022

R. C. Patel College of Arts, Commerce and Science of Shirpur held a lecture on youth and emotional appeals was organized under sexual harassment prevention committee on 10 September 2022 with head of the psychology department of the S.P.D.M. College Shirpur. Dr. N. S. Dongare was guest speaker for the program.

Dr. D. R. Patil sir was the president of the program. Dr. Anita Jadhav introduced the program and chief guests were introduced by Prof. Piyush Sonar.

Chief Lecturer Dr. N. S. Dongre has convinced the youth of today about how there are appeals in youth and how to balance them out.

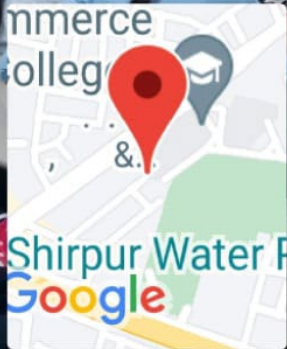

Many big challenges have come and stopped. Educated unemployment, not getting a job, lack of satisfaction in that job, economic hardship, lack of job retention and population explosion in the country are the most important challenges.

Competitions and exams in every field, huge number of candidates in every field, selection in thousands of applications and finally frustration at the end, is school and college education actually useful in life, is education only for job, is education for economic development a limited form?.

Today's youth study the situation by studying the times, their own inclination, self-confidence, self-reliance, positive thinking, choosing their education, their job, their field, only progress is more in that direction. Corruption is the biggest complex challenge in front of the society and in front of every youth. From where to pay the fees for the classes is a big question facing them?

In order to face the challenges of such various crises and problems, the youth of the new generation of the new age should gird up their waists, create a powerful group of positive thoughts and prepare for the protection of the country. Because the real test depends on the ability to decide, we should be able to make a decision from time to time. Today's situation is that the farmers have suffered huge losses due to rains and storms. All the crops in the fields have been washed away. Then the youth should not only insist on education but they can develop their interest in various industries and start small scale industries. And from that you can make your career and make your family happy and happy. To face all these challenges today, youths should earn their name by working without any shame and should fulfill their responsibility by becoming a responsible part of their family. Vote of thanks was given by Dr. R.S.Pawar. For the success of the program, Dr. J. P. Mahashabde tried and all the members of the committee tried.
